## NEWS

### Internet development at the retail level

April 27, 2009

Chronopassion, famous Parisian retailer, proposes as of today an extension of its [chronopassion.fr](http://chronopassion.fr) website conceived for the iPhone and the iPod Touch. This minisite gives the possibility of consulting a selection of watches particular to the image of [www.chronopassion.com](http://www.chronopassion.com), with photographs, descriptions, price and availabilities.

This mini-website for iPhone supplements the Chronopassion site in general while waiting for a development for smartphone.
